

# Database Management

MongoDB database is currently being used for this application.

MongoDB Compass is the most convenient way to manage the database MongoDB Compass:

## STEPS:

1. Open MongoDB Compass
2. Select "Connect" > "Connect to"
3. Enter the connection string <mongodb://8.210.28.169:27010/?readPreference=primary&appName=MongoDB%20Compass&ssl=false>
4. Hit the "CONNECT" button, you will be directed to the database, where can manage the data directly.
